## EDUCATION

2075 - 2078  
UNITED ACADEMY

- Computer Science

2079 - Present  
NEW SUMMIT COLLEGE

- Bachelor of Computer Science and Information Technology

## SKILLS

- HTML and CSS
- Tailwind CSS
- ReactJS
- NodeJS
- Express
- MongoDB

## EXPERIENCE

- Fresher

## PROFILE

Currently pursuing a degree in Computer Science with a focus on software development. Passionate about building robust web applications using Node JS and React Js. Actively seeking internships to gain practical experience and further enhance skills

## PROJECTS

### Style Kicks

- Developed a full-stack e-commerce website for shoes using the MERN stack, ensuring seamless integration between frontend and backend.
- Used MongoDB as the database to manage product details, user information and order records efficiently.
- Designed and implemented RESTful APIs with Express.js for smooth communication between the client and server.
- Created an interactive frontend using React.js.

### Product Store

- Created a product store application where users can add, update and manage products, simulating e-commerce admin functionality.
- Integrated Chakra UI for styling, leveraging its component library to ensure a modern and responsive design.
- Implemented a dark mode feature to enhance user experience and provide a visually comfortable interface.
- Enabled seamless CRUD operations for products by building RESTful APIs with Node Js and Express Js.

### Weather Application

- Developed a weather application to provide real-time weather updates for any location.
- Fetched and display weather data by integrating with a reliable third-party API.
- Implemented responsive design using CSS to ensure compatibility across devices and screen sizes.
